

DRIFT Open Tote Storage

Storage

General Specifications – DRIFT Mobile Open Tote Storage

End/Intermediate Panels: All end and intermediate panels are un-detailed 1" engineered wood with high pressure laminate or melamine on both faces; exposed edges are banded with 3mm PVC with edges and corners radiused 1/8". Intermediate panels are machined on both faces for the mounting of tote rails. One (1) mobile storage unit is constructed of two (2) end panels and two (2) intermediate panels.

Top: The top panel is 1" thick engineered with high pressure laminate or melamine faces. The edges are banded with 3mm PVC. The back edge of the panel is dadoed to contain the back panel. The top is attached with mounting brackets.

Base: The base is 1" thick engineered wood with a high pressure laminate or melamine face and a .030 phenolic backer; exposed edges are banded with 3mm PVC with edges and corners radiused 1/8". The back edge of the base is dadoed to contain the back panel. The base is fastened to the vertical panels with mounting brackets. 75mm locking swivel casters with thermoplastic elastomer treads are bolted to the bottom of the base using 5/16"-18 machine bolts. Casters are located at the four corners of the base.

Tote Rails: TOTR tote rails, which allow totes to be fully removable and Stop-n-Tilt are mounted on the inside faces of the end panels and both faces of the intermediate panels. Tote rail type and spacing is suitable for the use of TOT03- & TOT06- totes. *Totes are not included.*

Back Panel: Backs are 14-gauge perforated powder coated steel panels (DFTS). **Note:** Wood and Laminate back panels indicated in the Anyspace Catalog (171018) are no longer available.

Handles and Connecting Magnets: Models designated to receive handles and connecting magnets (DFTH and DFTSH) will have powder coated steel handles mounted on the cabinet top at each end. One set of round connecting magnets (one magnet and one plate) will be mounted on each end panel.

Note: DRIFT models ship assembled

18"D DRIFT units with connecting magnets are designed to connect with only 18"D DRIFT units.

24"D DRIFT units with connecting magnets are designed to connect with only 24"D DRIFT units.

HPL Construction - Open Tote
