Library Drawing Guidelines

A drawing of your existing or proposed library will be a great help. While an electronic CAD file is ideal, even a simple sketch will help to answer many questions.

Please include:

- As many dimensions as you can
- Wall, Door and window locations including window heights and whether doors swing in or out
- Columns pilasters or other similar architectural elements
- Labels for special areas (reading area, librarians office, etc.)
- Conditions that would affect furniture placement such as electrical and data outlets, light switches, thermostats, fire alarms/fire extinguisher cabinets, etc.
- Any special conditions or traffic pattern requirements that wouldn't be obvious from the floorplan
