ROCKIN' FURNITURE SINCE 1989

mediatechnologies is not the largest furniture manufacturer in Michigan but we are the self-proclaimed coolest. We have been making amazing wood products along the beautiful lakeshore of Lake Michigan since 1984. Ok, we started with electric guitars, but we've been Rockin' Furniture since 1989.

Our mediatechnologies brand of K-12 and public library furniture has earned the reputation of being "30-year furniture" (which means it lasts for a long time). Our strength lies in finding unique solutions to our customers' furniture needs because we have a rare and special talent... we actually listen to our customers.

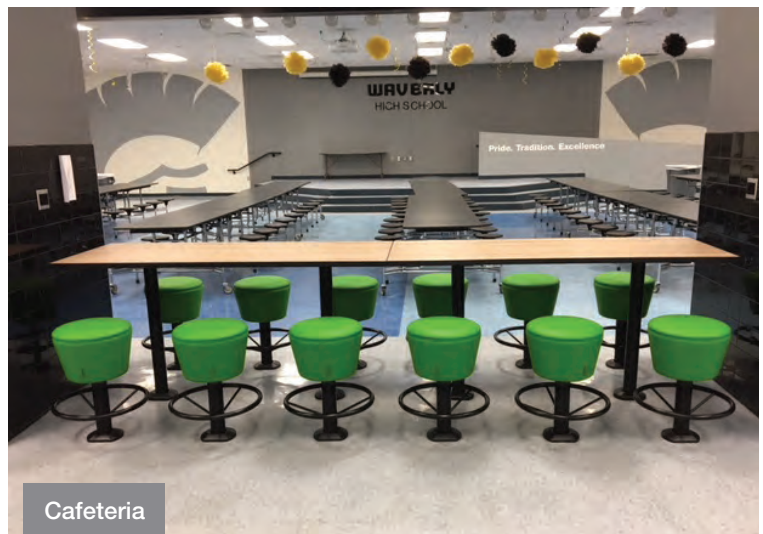

We are excited to be able to share this talent with you as a partner.

We welcome you to join us on our journey of awesomeness!

mediatechnologies® has been hard at work developing high quality, versatile and beautiful furniture for your project needs. Create a Commons, Café or Classroom. Choose pieces to enhance your Makerspace, Media Space or eSports arena

Valour

The Valour table serves as the backbone for any impromptu alternative instructional zone, empowering learners to take an active role in their education. From K-12 classrooms or administrative conference and training rooms, users can arrange full-time lounge seating and tables into endless configurations for that “just right” learning environment. Valour is defined by clean lines, and a simple leg to create a serpentine touchdown space that allows for greater capacity and interaction.

Cirrus eSports Console

Cirrus eSports Consoles are designed to support your gaming facilities, working seamlessly within your infrastructure to provide the ultimate club or team experience. Paired with ergonomic adjustable height chairs, like Vertagear Gaming Chairs, ensuring a comfortable and healthy posture for gamers while they compete! 3 models of Cirrus eSports Consoles are available, our Cabinet Back model features top of the line wire management, designed to create runs for 3 v 3, 6 v 6 competitions seamlessly. The Panel back model, is a lite version of the latter while still offering cable management. Our Curved model is unique to the eSports arena, as it creates more of a dome feeling, keeping gamers in their own space from the audience while still allowing for wire management. All models accept monitors on the back (spectator facing side) to allow for viewers to see gamers in action and view their personal stats.

TABLES & DESKS

Classroom tables and desks are not a one-size fits all, just as the classroom itself can be in a constant state of change, for different types of student and teacher focused functions. Our classroom tables and desks options offer many configurations for social and individual learning, group collaboration, and many more classroom layout and seating arrangements to fit the educators style of teaching and the students need for engagement and collaboration.

DESKS

Spec Desks...

are custom design solutions used on previous projects that inspired us. Many of these desks started out as “Modular desks” but needed something a little wider here and a little rounder there. You will recognize some of our examples as Malibu- and Keystone-design desks. (Hint: those are popular).

New items are added to this category throughout the year, so the very best place to view what designs may be available is on our webpage

www.mediatechnologies.com/products/desks/spec-desks.

Will one of these work for you?

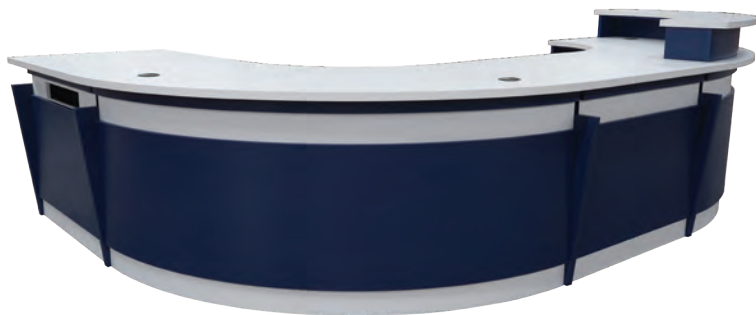

* Desks are available as specified. Changes in design or materials may incur an upcharge.

The Malibu Washington Circulation Desk features (2) two 35.5"H curved ADA desk sections, a 35.5"H Center ADA section and a side 29"H Desk unit with a 9" transactions top. All units with Malibu decorative details.

KEYSTONE DESIGN
SPEC DESK

Above and Right: See two treatments of the same Keystone design desk. It's popular. Single desk module between two round corner modules, one corner with transaction top. Book return module on one end. Continuous top.

The Malibu-design spec desk example above features a central book return, two wide-radius corners, a recessed area for seating and a continuous transaction top. (of course the stools can be included...if you order them).

Starter & Adder Construction

Metro Initial Starter Unit

Initial starter unit comes with two designer end panels. When adding to a run, removal of one designer panel is required to finish the end of a run with a designer panel.

Metro Starter

Bookmark Adder

Starter and adder units allow you to create a long run of shelving.

Starter units are specified according to designer or product line; adder units for all Bookmark shelving product lines are specified as series 21 and use the same un-detailed intermediate panel. The end of the shelving run is completed with the installation of the removed designer end panel.

What is a continuous top?

In a typical shelving run, the tops are in-between the vertical panels. The optional continuous top creates a smooth continuous surface.

Optional Continuous Canopy Tops: Optional continuous tops are 1-1/4" thick three ply construction, with a .050" laminate face, engineered wood core and a phenolic backer sheet. The common top is banded on all exposed sides with 1/8" solid hardwood. Top is replaced with box frame.

Continuous tops are not available for Benchmark or 31-Series bookcases.

STORAGE

Drift Storage Solutions

Utilize every storage space you can as your supply of instructional materials and the number of pupils in your class expand. Finding innovative, adaptable, and useful storage solutions that satisfy the demands of both teachers and students is even more crucial. With mobile storage cabinets, storage cubbies, tote trays, and more, mediatechnologies' Drift offers a scalable and all-inclusive approach to organizing learning resources in both TFL and HPL – including markerboard. Optional magnets and handles are ideal when mating with Drift shelving.

STORAGE

Rubix Mobile Storage Collection

This adaptable, transportable storage solution makes it simple for teachers to organize, store, and distribute educational resources. The reinforced bottom and powder-coated metal frame of The Rubix Collection make it a durable, high-capacity, portable storage option. One of the most adaptable storage alternatives on the market today, Rubix is offered in over a hundred distinct HPL, TFL, or veneer combinations, 19 powder coat possibilities, numerous widths and heights - both exposed and concealed fronts. Adjustable shelves, totes, whiteboard panels, Lego® panels, locks, and hidden hinges are additional features.

Psst... The breadth of line mimics mediatechnologies® Definitions line making the two a perfect pair in environments where you need both mobile and static storage solutions.

Rubix Accessories

A World of Finishes...

Yeah, we can finish your Rubix cabinet just how you want it - HPL, TFL, Veneers and custom graphic laminates. But did you know that we can go way beyond simply "markerboard" when it comes to functional finishes?

* Except where indicated, all model number are shown at 18"D with melamine finish. High-pressure laminate finish is also available.
