

Mount it • Change it • Move it

Affordable, Wall-mountable, Changeable, Reusable, Repurpose-able, Flexible Storage

transition

mediatechnologies®

Introducing... **transition**, the affordable, flexible

Mount it

Wall-mounted Track System

The **transition** storage system is track-mounted, you can use it on any wall surface where you can mount the track. The aluminum track mounts to the wall and is the key to the transition flexible storage system. Pre-installed cabinet brackets secure the storage unit to the track.

In addition, your track can accommodate the broad variety of cabinets, marker and tack boards, workspace components of the elements® line.

Change it

Flexibility for growth already built in

With the flexible **transition** storage system, it is easy to add the storage elements that make sense for your application today **and change them as your needs change in the future.**

Add additional shelves, doors, drawers, sliding marker boards, lockers and adder units as your requirements dictate. No need for long-range space planning – **change your space “on the fly.”**

storage system from **mediatechnologies®**

MMMM Move it

**Repurpose, Reuse,
make your investment count!**

You can move your **transition** storage units to any wall space where you can mount the track. Loosen the pre-installed cabinet brackets, remove the unit from the track, relocate the storage unit, tighten the pre-installed cabinet bracket and you're done.

Repurpose the room, move to a different room, move to a different building - **relocating and reconfiguring components is simple AND easy.**

Match it

**Match your space
Match your budget**

transition's simple and clean design and variety of finish options make it appropriate in nearly any environment. ...office, higher education, commons area, display, retail, classroom, storage, etc.

Match your environment's design and décor. Match your budget. **transition is the perfect fit now and as you transition into the future.**

The aluminum track mounts to the wall* and is the key to the transition flexible storage system. Track is available in a variety of powder coat colors.

Pre-installed cabinet brackets secure the storage unit to the track.

Units mounted to the **lower** horizontal mounting track only.

- Available in three heights which permit the nominal finished counter top height to be 31", 34" or 36". 31" high cabinets are considered youth height. 34" high cabinets are considered ADA height.

Units mounted to the **upper** horizontal mounting track only.

- Available in two heights which permit the nominal installed cabinet height to be 84" from the floor.

Pre-installed cabinet bracket

Units mounted to **both the upper and lower** horizontal mounting track.

- Available in 84" from floor nominal installed cabinet height only.

*Track must be mounted to a structural wall: a structural wall is defined as a load-bearing wall constructed of materials such as: poured concrete, concrete block, or studs. Wood studs must be a nominal 2" x 4" size minimum. Metal studs must be "C" channel, 20-gauge thick minimum. Metal or wood studs must be on centers no greater than 16" and have maximum heights of 10' restrained at floor and ceiling. Interior walls shall be designed to resist not less than a force of 5 lbs. per square foot applied perpendicular to wall. The deflection of such walls under a load of 5 lbs. per square foot shall not exceed 1/400th of the span for walls with brittle finishes, and 1/124th of the span for walls with flexible finishes. If you have any questions concerning your load-bearing structures, please consult your architect or structural engineer.

Wall mounting system for movably mounting modular institutional furniture and fixtures is protected by U.S. Patent No.: US 8,434,835 B2
